

The Laboratory Benefit Management Program was developed to help manage appropriate utilization for outpatient laboratory services. As part of this program, the following Decision Support Tests require Prior Authorization or Advanced Notification.

MDX Hawai'i has chosen Beacon Laboratory Benefit Solutions, Inc. (BeaconLBS®) to administer the Laboratory Benefit Management Program. BeaconLBS has developed Physician Decision Support to assist physicians in their test and lab selection based on recognized standards of practice, CMS policies, and the MDX Hawaii Prior Authorization policy.

Ordering physicians must use Physician Decision Support to submit an Advanced Notification or request a Prior Authorization for Decision Support Tests from a network provider authorized to perform them. Physician Decision Support is available as a standalone application to registered users at [BeaconLBS.com](https://BeaconLBS.com). It is also integrated with a variety of EHRs and laboratory ordering systems.

An Outcome Summary is automatically generated for Decision Support Tests ordered using Physician Decision Support. It will confirm that Advance Notification was completed or Prior Authorization was requested, if applicable. Rendering providers must confirm receipt of the Outcome Summary for any of the Decision Support Tests prior to performing the tests.

### Prior Authorization\* (Precertification) Tests

4K Score	HLA-B*15:02 Genetic Testing
Afirma™ Assay by Veracyte	IHC and Special Stains
Breast Cancer Index	MammaPrint Breast Cancer Recurrence Assay
Clonoseq	Molecular Gene, Statutory Exclusion (single gene & panels)
ConfirmMDx Epigenetic Molecular Assay	Multi-Gene Pharmacogenetic Testing
CYP2C19 gene	Oncotype DX Breast Cancer Test
EndoPredict Breast Cancer Test	Procalcitonin (PCT)
GeneSight® Psychotropic	Progenesa® PCA3 Assay
Guardant360® Plasma-Based Comprehensive Genomic Profiling	Prosigna Breast Cancer Assay
Hereditary Breast & Ovarian Cancer Testing & Multi-Gene BRCA	Tumor Profiling Panels

### Advanced Notification Tests

Chlamydia / Gonococcus, NAT	Parathyroid hormone (PTH)
Cytology (Non-Gynecological)	Testosterone
Drug Testing - Definitive Testing	TSH
Drug Testing - Presumptive Testing	Free T3
HIV-1, Quantitative, RNA	Free T4
HPV, High-risk DNA Detection	Thyroid Panel
Leukemia / Lymphoma Immunophenotyping Profile	UroVysion
Pathology - Dermatopathology	Vaginitis / Vaginosis
Pathology - Hematopathology	Vitamin B12
Pathology - All Other Pathology	Vitamin D, 25, Hydroxy
Prostate Specific Antigen (PSA)	

\* All Prior Authorization requests will be reviewed and approved by MDX Hawai'i.
